

*"Day for Night" Score*

Two optical light units are situated side by side. Each unit is built with two 5,000 Kelvin bulbs, running on its own timescale. The optical light unit on the left runs on 24 hour time, beginning at 12 am, and a constant speed, emitting a warm, amber glow. The optical light unit on the right runs once an hour for 16 min, in the final quarter of each hour emitting a cool, white light.
